DISCLAIMER

No Representations and Warranties

This presentation of Gores Metropoulos, Inc. ("Gores") and Lumina Technologies, Inc. ("Lumina" or the "Company") is for informational purposes only and does not constitute an offer to sell, a solicitation of an offer to buy, or a recommendation to purchase any equity, debt or other financial instruments of Lumina or Gores or any of their respective affiliates' securities (as such term is defined under U.S. federal securities laws). This presentation has been prepared to assist interested parties in making their own evaluation with respect to the proposed business combination and for no other purpose. Lumina and Gores assume no obligation to update or keep current the information contained in this presentation, to remove any outdated information or to expressly mark it as being outdated. No securities commission or securities regulatory authority or other regulatory body or authority in the United States or any other jurisdiction has in any way passed upon the merits of, or the accuracy and adequacy of, this presentation.

You should not construe the contents of this presentation as legal, accounting, business or tax advice and you should consult your own professional advisors as to the legal, accounting, business, tax, financial and other matters contained herein. No representation or warranty, express or implied, is or will be given by Gores nor Lumina nor any of their respective officers, directors, officers, employees or advisors or any other person as to the accuracy or completeness of the information in this presentation (including as to the accuracy or reasonableness of statements, estimates, targets, projections, assumptions or judgment) or any other written, oral or other communications transmitted or otherwise made available to any party in the course of its evaluation of a possible transaction. Accordingly, none of Gores and Lumina or any of their respective officers, directors, officers, employees, or advisors or any other person that be liable for any direct, indirect, or consequential loss or damages suffered by any person as a result of relying on any statement in or omission from this presentation and any such liability is expressly disclaimed. Certain information contained herein has been derived from sources prepared by third parties. While such information is believed to be reliable for the purposes used herein, none of Gores, Lumina or their respective affiliates' directors, officers, employees, members, partners, stockholders, or agents makes any representation or warranty with respect to the accuracy of such information.

This presentation is not an expression of Gores' interest in Lumina and does not constitute an offer or agreement to acquire Lumina, it being understood that the terms of any such acquisition would be set forth in definitive documents in form and substance satisfactory to the parties and executed by them.

Forward-Looking Statements

This presentation includes "forward-looking statements" within the meaning of the "safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by the use of words such as "future," "growth," "opportunity," "well-positioned," "expect," "intend," "seek," "target," "anticipate," "believe," "expect," "estimate," "plan," "outlook," and "project" and other similar expressions that predict or indicate future events or trends or that are not statements of historical matters. Such forward-looking statements include, but are not limited to, projected financial information, statements regarding estimates and forecasts of other financial and performance metrics, projections of market opportunity and market share and statements regarding the proposed relationship between Lumina and Intel and the implications of those arrangements and related agreements on Lumina's business and results of operations. Such forward-looking statements with respect to revenues, earnings, performance, strategies, prospects and other aspects of the business of Gores, Lumina or the combined company after completion of any proposed business combination are based on current expectations that are subject to risks and uncertainties. These statements are based on various assumptions, whether or not identified in this presentation, and on the current expectations of Gores' and Lumina's management and are not predictions of actual performance. These forward-looking statements are provided for illustrative purposes only and are not intended to be used as, and should not be relied on by any investor as, a guarantee, an assurance, a prediction or a definitive statement of fact or probability.

A number of factors could cause actual results or outcomes to differ materially from those indicated by such forward-looking statements. These factors include, but are not limited to: the inability to complete the transactions contemplated by the proposed business combination; the inability to recognize the anticipated benefits of the proposed business combination, which may be affected by, among other things, competition, and the ability of the combined business to grow and manage growth profitably; costs related to the proposed business combination; changes in applicable laws or regulations; the inability to successfully retain or recruit officers, key employees or directors following the proposed business combination; effects of Gores' public securities' liquidity and trading; the market's reaction to the proposed business combination; the lack of a market for Gores' securities; Gores' and Lumina's financial performance following the proposed business combination; the possibility that Lumina or Gores may be adversely affected by other economic, business, and/or competitive factors, including the level of demand and financial performance of the autonomous vehicle industry and market adoption of labor; the risk that any required regulatory approvals are not obtained, are delayed or are subject to unanticipated conditions that could adversely affect the proposed business combination or the expected benefits of the proposed business combination; the risk that the approval of the stockholders of Gores or Lumina is not obtained; risks related to Lumina's relationship with Volvo, and the related timing of production schedules and other key milestones; the amount of redemption requests made by Gores' public stockholders; the inability of Lumina to adequately protect or enforce its intellectual property rights or prevent unauthorized parties from copying or reverse engineering its solutions which efforts to protect and enforce Lumina's intellectual property rights and prevent third parties from violating its rights may be costly; any legal and/or regulatory proceedings and commercial or contractual disputes in which Lumina may become involved, which could have an adverse effect on its profitability; changes in the price of key materials and disruptions in supply chains for these materials; the impact of the global COVID-19 pandemic; and other risks and uncertainties indicated from time to time in the first prospectus of Gores filed on February 1, 2019, Annual Report on Form 10-K for the fiscal year ended December 31, 2019 and Quarterly Report on Form 10-Q for the quarter ended June 30, 2020, in each case under "Risk Factors," and other documents filed or to be filed with the Securities and Exchange Commission (the "SEC") by Gores. There may be additional risks that neither Gores nor Lumina presently know or that Gores and Lumina currently believe are immaterial that could cause actual results to differ from those contained in the forward-looking statements.

You are cautioned not to place undue reliance upon any forward-looking statements, including the projections, which speak only as of the date made. Neither Gores nor Lumina undertakes any commitment to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.

Accordingly, forward-looking statements, including any projections or analysis, should not be viewed as factual and should not be relied upon as an accurate prediction of future results. The forward-looking statements contained in this presentation are based on our current expectations and beliefs concerning future developments and their potential effects on Gores and Lumina. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond our control), or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements.

Should one or more of these risks or uncertainties materialize, or should any of our assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws. Accordingly, you should not put undue reliance on these statements.

DISCLAIMER

Use of Projections

This presentation contains financial forecasts with respect to certain financial measurements of Lumina, including, but not limited to Lumina's projected Revenue, Free Cash Flow and Adjusted EBITDA for Lumina's fiscal years 2020 through 2025. Such projected financial information constitutes forward-looking information, and is for illustrative purposes only. It is based on assumptions and estimates, and is subject to a wide variety of risks and uncertainties. Lumina does not intend to update or revise its projections, whether as a result of new information, future events or otherwise. These projections should not be relied upon as being necessarily indicative of future results, neither does Lumina undertake any commitment to update or revise the projections, whether as a result of new information, future events or otherwise.

In this presentation, certain of the above-mentioned projected information has been repeated in each case, with an indication that the information is an estimate and is subject to the qualifications presented herein, for purposes of providing comparisons with historical data. The assumptions and estimates underlying the prospective financial information are inherently uncertain and are subject to a wide variety of significant business, economic and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the prospective financial information. See "Forward Looking Statements" paragraph above. Accordingly, there can be no assurance that the prospective results are indicative of the future performance of Lumina or that actual results will not differ materially from those presented in the prospective financial information. Inclusion of the prospective financial information in this presentation should not be regarded as a representation by any person that the results contained in the prospective financial information will be achieved.

Results and Market Data

In this presentation, Lumina and Goies rely on and refer to information and statistics regarding the sectors in which Lumina operates and other industry data. Goies and Lumina obtained this information and statistics from third party sources, including reports by market research firms. Although Goies and Lumina believe these sources are reliable, they have not independently verified the information and do not guarantee its accuracy and completeness. Goies and Lumina have supplemented this information where necessary with information from discussions with Lumina customers and Lumina's own internal estimates, taking into account publicly available information about other industry participants and Lumina's management's best view as to information that is not publicly available.

Use of Non-GAAP Financial Measures

The financial information and data contained in this presentation is unaudited and does not conform to Regulation S-X promulgated under the Securities Act of 1933, as amended. Accordingly, such information and data may not be included in, may be adjusted in or may be presented differently in any proxy statement/prospectus to be filed by Goies with the SEC.

This presentation includes non-GAAP financial measures, including earnings before interest, taxes, depreciation and amortization ("EBITDA") and Free Cash Flow ("FCF"). Free Cash Flow is defined as EBITDA less capital expenditures (including postmerger acquisitions) less changes in net working capital less net interest expense less taxes (including the benefit of existing and future net operating losses).

Goies and Lumina believe that these non-GAAP measures of financial results provide useful information to management and investors regarding certain financial and business trends relating to Lumina's financial condition and results of operations. Lumina's management uses these non-GAAP measures to compare Lumina's performance to that of prior periods for trend analysis and for budgeting and planning purposes. These measures are used in Lumina's financial reports prepared by management and Lumina's board of directors. Goies and Lumina believe that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating ongoing operating results and trends. Management of Lumina does not consider these non-GAAP measures in isolation or as an alternative to financial measures determined in accordance with GAAP. The principal limitation of these non-GAAP measures is that they exclude significant expenses and income that are required by GAAP to be recorded in Lumina's financial statements. In addition, they are subject to inherent limitations as they reflect the exercise of judgment by Lumina's management about which expenses and income are excluded or included in determining these non-GAAP measures.

Other companies may calculate non-GAAP measures differently, and therefore the non-GAAP measures of Lumina included in this presentation may not be directly comparable to similarly titled measures of other companies.

Additional information about the transactions and where to find it

Goies has filed a registration statement on Form S-4 with the SEC (the "Registration Statement") that includes a preliminary proxy statement, consent solicitation statement and prospectus with respect to Goies' securities to be issued in connection with the proposed transactions contemplated by the Merger Agreement and Plan of Merger by and among Goies, Deer Metropoulos, Inc., Deer Metropoulos, LLC and Lumina (the "Merger Agreement") and also contains a preliminary prospectus of Goies and a final definitive proxy statement/consent solicitation statement/prospectus and other relevant documents to its stockholders. The Registration Statement, including the proxy statement/consent solicitation statement/prospectus contained therein, when it is declared effective by the SEC, will contain important information about the proposed transactions contemplated by the Merger Agreement and the other matters to be voted upon at a meeting of Goies' stockholders to be held to approve the proposed transactions contemplated by the Merger Agreement and the other matters (the "Special Meeting") and is not intended to provide the basis for any investment decision or any other decision in respect of such matters. Goies' stockholders and other interested persons are advised to read, when available, the Registration Statement and the proxy statement/consent solicitation statement/prospectus, as well as the amendments or supplements thereto, because they contain or will contain important information about the proposed transactions, when available. The definitive proxy statement/consent solicitation statement/prospectus will be mailed to Goies' stockholders as of a record date to be established for voting on the proposed transactions contemplated by the Merger Agreement and the other matters to be voted upon at the Special Meeting. Goies' stockholders will also be able to obtain copies of the definitive proxy statement/consent solicitation statement/prospectus, without charge, once available, at the SEC's website at www.sec.gov or by directing a request to: Goies Metropoulos, Inc., 1800 Wilshire Boulevard, Beverly Hills, CA 90212, attention: Jennifer Kwon Chou (jchow@goies.com).

No Offer or Solicitation

This presentation is prepared for informational purposes only and shall not constitute an offer to sell, the solicitation of an offer to buy any securities or a solicitation of any vote in any jurisdiction pursuant to the proposed business combination or otherwise, nor shall there be any sale of securities in any jurisdiction in which the offer, solicitation or sale would be unlawful prior to the registration or qualification under the securities laws of any such jurisdiction. No offer of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Participation in the Solicitation

Lumina and Goies and their respective directors and officers and other members of management and employees may be deemed participants in the solicitation of proxies in connection with the proposed business combination. Goies' stockholders and other interested persons may obtain, without charge, more detailed information regarding directors and officers of Goies in Goies' Annual Report on Form 10-K for the fiscal year ended December 31, 2018, which was filed with the SEC on March 13, 2020. Information regarding the persons who may, under SEC rules, be deemed participants in the solicitation of proxies to Goies' stockholders in connection with the proposed business combination will be included in the proxy statement/prospectus Goies intends to file with the SEC.

Trademarks and Trade Names

Goies and Lumina own or have rights to various trademarks, service marks and trade names that they use in connection with the operation of their respective businesses. This presentation also contains trademarks, service marks and trade names of third parties, which are the property of their respective owners. The use or display of these parties' trademarks, service marks, trade names or products in this presentation is not intended, and does not imply, a relationship with Goies or Lumina, or an endorsement or sponsorship by or of Goies or Lumina. Solely for convenience, the trademarks, service marks and trade names referred to in this presentation may appear without the ®, ™ or SM symbols, but such references are not intended to indicate, in any way, that Goies or Lumina will not assert, to the fullest extent under applicable law, their rights or the right of the applicable owner in these trademarks, service marks and trade names.

Many statements and the case studies contained herein relate to (i) The Goies Group, LLC (the "Goies Group"), certain of its affiliated funds or Goies Holdings, Inc. ("Goies Holdings"), Goies Holdings II, Inc. ("Goies Holdings II") or Goies Holdings III, Inc. ("Goies Holdings III") or (ii) Deer Metropoulos or businesses affiliated with her or his affiliates. An investment in Goies Metropoulos, Inc. is not an investment in the Goies Group. Its affiliated funds, Goies Holdings, Inc., Goies Holdings II or Goies Holdings III or Deer Metropoulos or businesses affiliated with her or his affiliates. The historical results of the Goies Group, its affiliated funds, Goies Holdings, Inc., Goies Holdings II or Deer Metropoulos or businesses affiliated with her or his affiliates are not necessarily indicative of the future performance of Goies Metropoulos, Inc.

THE LUMINAR TEAM

Austin Russell, Founder & CEO
LUMINAR

- Founded Luminar in 2012 at the age of 16. Was an independent researcher at the Beckman Laser Institute
- In 2013, awarded the prestigious Thiel Fellowship & dropped out of Stanford to focus on Luminar full-time
- By 2018, named to Forbes 30 under 30 and MIT 35 under 35

Tom Fennimore, CFO
LUMINAR

- Spent 17 years at Goldman Sachs across various sectors including ECM and M&A before being appointed Global Head of Automotive
- Subsequently moved to Jefferies as Co-Head of Industrials and Global Head of Auto Investment Banking
- B.S. in Mathematics and Engineering

Alec Gores, Sponsor, Incoming Director
GORES METROPOULOS

- Founder, Chairman and Chief Executive Officer of The Gores Group
- 35+ years of experience as an entrepreneur, operator and private equity investor
- Has invested in 100+ portfolio companies through varying macroeconomic environments
- Raised six SPACs to date (totaling \$2.5+ billion before PIPE commitments)

Jason Eichenholz, PhD

Chief Counsel @ NHTSA

Marc Losiewicz
Business Development
Auto / ADAS Biz Dev Leader
VP ADAS & Global Safety @ ZF

GORES METROPOULOS OVERVIEW

— GORES METROPOULOS

Proven SPAC Track Record

- 3 completed transactions totaling over \$6 billion of enterprise value with \$2.1 billion in new cash equity delivered
- 6 SPACs raised to date, totaling over \$2.5 billion (prior to PIPE commitments)

Proceeds Certainty and Trading Performance

- Virtually zero redemptions across three completed deals
- Hostess, Verra, and PAE, respectively, provided 104%, 66% and 26% returns to IPO investors within one year of close⁽¹⁾

Alignment with Key Stakeholders

- Selling shareholders: compelling valuations and upside potential from rollover shares and earnout
- Investors: attractive entry valuation with long-term return potential
- Over \$200 million of capital committed from Gores Sponsor in prior deals

An Attractive Opportunity for Prospective Targets

- Significant experience ensures seamless transaction from upfront diligence through transaction close
- Proven record of providing expedited access to liquidity, capital and value creation

— PREMIER SPAC TRACK RECORD

	GORES HOLDINGS	GORES HOLDINGS II	GORES HOLDINGS III
	\$375 million debut SPAC	\$400 million 2 nd SPAC	\$400 million 3 rd SPAC
			
Transaction Close	October 2016	October 2018	February 2020
Enterprise Value	\$2.3 billion	\$2.4 billion	\$1.5 billion
Proceeds Delivered	\$725 million	\$800 million	\$620 million
Redemption Rate	0%	<1%	0%
One Year IPO Investor Return⁽¹⁾	104%	66%	26%

Note: Gores Metropoulos is a separate entity from The Gores Group and Dean Metropoulos or businesses affiliated with him or his affiliates. The Gores Group and Dean Metropoulos or businesses affiliated with him or his affiliates make no representations of the information contained within, nor should this information be considered if making an investment decision with regard to the Gores Group and its affiliated funds/family office operations and/or Dean Metropoulos or businesses affiliated with him or his affiliates.

¹ Represents maximum unit return based on IPO buy-in price of \$10.00 per share. Note that PAE transaction closed in February 2020.

INVESTMENT HIGHLIGHTS

Large and Rapidly Growing TAM⁽¹⁾

- $\\$58$ today, projected to grow to $-\\$1508$ in 2030E
- Near-term focus on passenger and commercial vehicle autonomy on highways + ADAS applications

Breakthrough Technology Built From Scratch

- Differentiated lidar architecture and component-level innovation built from the chip-level up
- 94 patents issued/allowed + 80 applications pending⁽²⁾

Scaling the World's First Auto-Grade Autonomous Technology

- Only lidar meeting OEM specs to safely enable highway autonomy for series production
- Robust scalable architecture designed for passenger and commercial production vehicles

Deeply Integrated Hardware/Software Solution

- Proprietary software purpose built to unlock full Luminar lidar capabilities
- Jointly building full-stack highway autonomy and proactive safety products

Awarded Industry's First Series Production Contract for Autonomy by Volvo

- Luminar hardware and software powering Volvo's next-gen consumer vehicle platform, starting in 2022E
- Partnering with global leader in automotive safety

Partnered with Leading Global Automakers

- 50 OEM and other commercial/strategic partners, including 7 of the world's top 10 automakers
- Product integration into customers' development vehicles leads to "sticky" relationships

Compelling Growth, Margin, and Cash Flow Profile

- Robust customer base and visibility to series production enables rapid expansion of backlog
- High shareholder return potential from scalability, integrated HW + SW products and low capital intensity

Deep Bench of Industry Leaders

- Visionary leadership with track record of innovation and execution in the auto industry

¹ Includes lidar plus AV and ADAS software. Source: Luminar estimates incorporating data from IHS Markit, LMC Automotive, Company Filings, and Wall Street equity research.

LUMINAR HIGHWAY AUTONOMY
ENABLED BY LONG-RANGE, HIGH-PERFORMANCE LUMINAR LIDAR

- Enabling Autonomy**
- Eyes-off functionality gives time back to the driver
 - Improved safety with small object detection, free space
 - Increased availability in low light and inclement weather
 - Long range, high speed performance

THE ROLE OF SENSORS IN AUTONOMY

Neither camera nor camera fused with radar offer high confidence 3D perception. Lack of confidence leads to:

- Limited and inconsistent safety performance
- The requirement for human supervision

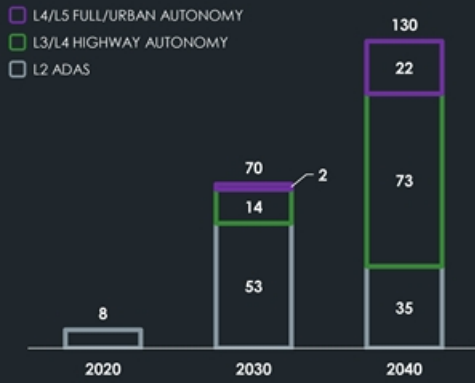

High resolution, long range lidar sensing adds the detection, classification, and range measurement confidence to unlock highway autonomy and reliable and consistent safety functionality

V O L V O

2022E START OF PRODUCTION

Volvo, a global leader in automotive safety, is setting new safety and technology standards by partnering with Luminar to enable its first fully self-driving technology for highways in next-generation production vehicles

Leveraging Luminar's hardware and software for series production also paves the way for future active safety developments

Flagship customer de-risks industrialization, enables economies of scale, and accelerates widespread adoption

— POWER OF DATA —

Collecting data for continuous software improvement

Over-the-air updates enable performance capability and safety upgrades over time

— INDUSTRIALIZATION —

Validates technology and de-risks industrialization

Enables economies of scale required for enhanced unit economics

Completed Volvo's comprehensive RFQ audits

Auto qualification accelerates transition of OEM partners to series production across the industry

BREAKTHROUGH INNOVATIONS

Receiver

Ultra high efficiency, low-cost architecture

Emitter

Proprietary hybridized low-cost 1550nm laser

Scanner

Dynamic scanning with low-mass, auto-grade mirrors

Processor

4th major generation Luminar ASICs, designed from scratch in-house

PROPRIETARY ARCHITECTURE

Delivering the range and resolution performance expected to safely unlock hands-off and eyes-off highway driving

SAFETY AT HIGH SPEEDS

Luminar technology detects dark objects up to 250m away, providing 7 seconds of reaction time while traveling at 65 miles per hour

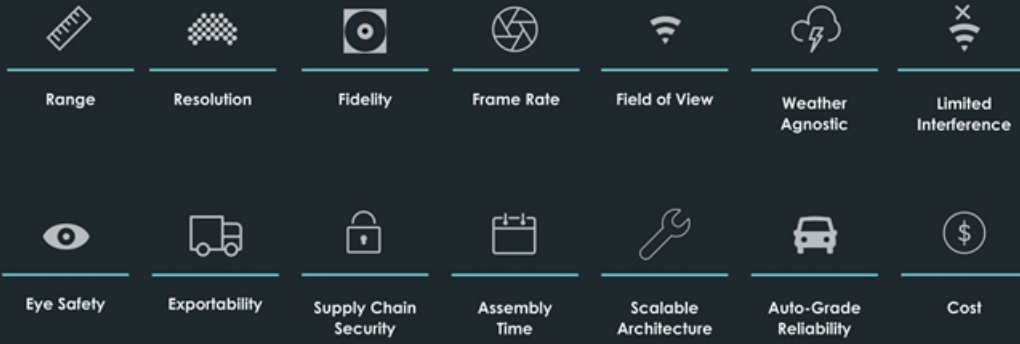

Next best resolution to reliably detect dark objects only has a range of 45m, providing only 1 second of reaction time

INDUSTRY-LEADING PERFORMANCE

Note: All data sourced from company spec sheets & physics. OEM requirement based on Luminar's assessment of OEM RfIs.

AUTONOMOUS VEHICLE LANDSCAPE

Luminar is the only company capable of powering passenger vehicle highway autonomy

Source: Company filings, press releases, Pitchbook, Financial Times (Waymo)

- AV Robo-Taxi Data Strategy

One city at a time...

Billions have been invested in urban-focused self-driving, looking to tackle the most difficult autonomy domain.

Infrastructure and development fleet expansion is focused on one city at a time, which requires an extremely high investment and is not scalable for series production.

- Luminar's Data Strategy

Leveraging Scale of Passenger Vehicles

Deploying global consumer and commercial highway autonomy with Luminar partners enables effective data collection for autonomy at unprecedented scale, further improving software safety and functionality over time.

By 2025E, up to
~1,000,000
Vehicles Collecting Data Globally
(cumulative)

LUMINAR

DELIVERING FULL STACK HIGHWAY AUTONOMY

Luminar's proprietary software is purpose-built to unlock its full lidar capabilities, delivering a turn-key solution that accelerates the ability for OEMs to deliver high-speed highway autonomy at commercial series production scale

Smooth and safe maneuvers powered by confident perception

Reliable detection and classification at long distances, provide more time at high highway speeds for planning and decision making

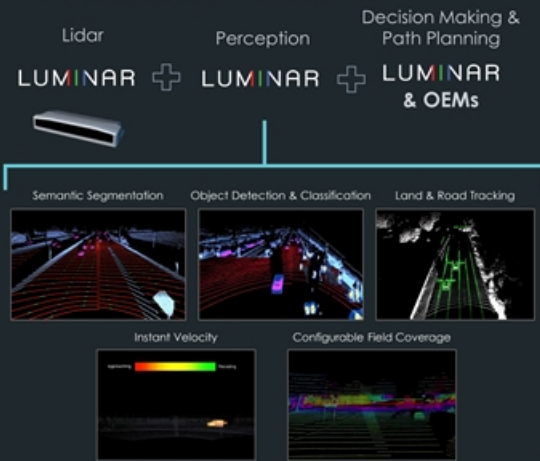

Over-the-air (OTA) performance upgrades enabled by software

Access to data accelerates software development and functionality

FULL STACK HIGHWAY PRODUCT

To deliver highway automation and proactive safety, a vehicle needs to:

Understand the complete scene, in any environment

SEMANTIC SEGMENTATION

Assigns a "type" to each object in a scene; examples include driveable road, non-driveable space, lanes, etc

Luminar value add: the unique ability to understand a complete scene in 3D in one single sensor

Detect and classify objects at long distance, in all lighting and weather conditions

OBJECT DETECTION & CLASSIFICATION

Detect objects in a scene, at a long distance, and classify those objects as vehicle, pedestrians, and cyclists

Luminar value add: provides more time at high highway speeds for planning and decision making at night and in inclement weather/environments

Track lane and road markings, identifying driveable and non-driveable space

LANE & ROAD TRACKING

Detects and classifies lane markings and road edges; classifies single, double, dotted and dashed lines; assigns objects a lane ID, even in the absence of lane markings

Luminar value add: provides information for path planning and decision making; extends road and lane capture beyond the ability of headlights, a failsafe operation if headlights are not functioning properly

Luminar enables automakers to provide greater value to consumers and save lives

HIGHWAY AUTONOMY

Luminar's full-stack solution accelerates the ability for OEMs to deliver high-speed highway autonomy at production scale

With software updates over-the-air, performance upgrades can be provided, including the expansion of operational domains

This is bolstered by our analysis and training from an ever-growing data lake that includes comprehensive representations of edge cases

¹ Based on relevant NCAP test scenarios and Luminar simulation.

PROACTIVE SAFETY

ADAS enhanced by Luminar provides higher confidence detection, faster and farther than camera and radar, enabling proactive collision avoidance at all speeds

Luminar proactive safety could decrease the current reported collision occurrence rates by up to **7X⁽¹⁾**

This presents an opportunity to subsidize and standardize Luminar products with OEMs through reduced insurance rates

In 2019, AAA warned that pedestrian detection systems don't work when needed most

89%

collision occurrence:
child pedestrian

60%

collision occurrence:
adult pedestrian

80%

collision occurrence:
two adults roadside

The study of four sedans, including Tesla, pedestrian detection with Automatic Emergency Braking was tested at 20 mph resulted in the above

PROACTIVE SAFETY ENABLES INSURANCE OPPORTUNITY

- Substantial safety improvement from Luminar's Proactive Safety solution could cut cost of insurance to partially or fully subsidize product cost
- Potential to accelerate standardization of Luminar lidar and software across the industry
- This upside opportunity is not included in Luminar's current financial forecast

Unlocking attractive economics through subsidizing or standardizing Luminar products with OEMs

Allowing OEMs to own the entire vehicle life-cycle; streamlining the customer experience

Collecting, supplying and analysing insurance-related data

Creating a partnership ecosystem comprised of current forward-looking insurance providers/new entrants

Transparency in the total cost of car ownership

Aligning insurance with the actual use and application

LUMINAR'S CURRENT & TARGET PARTNER ECOSYSTEM

50 current commercial partners represent ~75% of target passenger vehicle, trucking and robo-taxi ecosystem

PARTNERED WITH MOST MAJOR AV TRUCKING PROGRAMS

Leveraging the same Luminar Highway Autonomy hardware/software products and economies of scale from passenger vehicles for long-haul commercial trucking

Source: <https://medium.com/ike-blog/powerred-by-ike-e072261c3dd2>

US federal law permits all levels of autonomy in passenger vehicles and trucks, provided they are safe and meet the federal motor vehicles safety standards.

Current requirements for occupant safety, seating and instrumentation, however, will be a challenge for many robo-taxi concepts until those standards are adapted.

Trucks must also remain compliant with US motor carrier regulations, particularly hours of service rules.

US states, who regulate the actual operation of all vehicles on their roads, are largely permissive of autonomous functionality up to Level 4. Notably, however, California still has certain vehicle registration requirements around higher levels of autonomy and New York state continues to require a driver to keep one hand on the wheel.

ROBUST PIPELINE

- Luminar is working closely with its partner base to transition programs through the validation and advanced development stages towards series production following the win with Volvo
- Working with our partners to convert an additional 8 programs to series production over next 24 months

CURRENT PARTNER FUNNEL BY STAGE⁽¹⁾

IRIS – ANTICIPATED VOLUME PRODUCTION TIMELINE

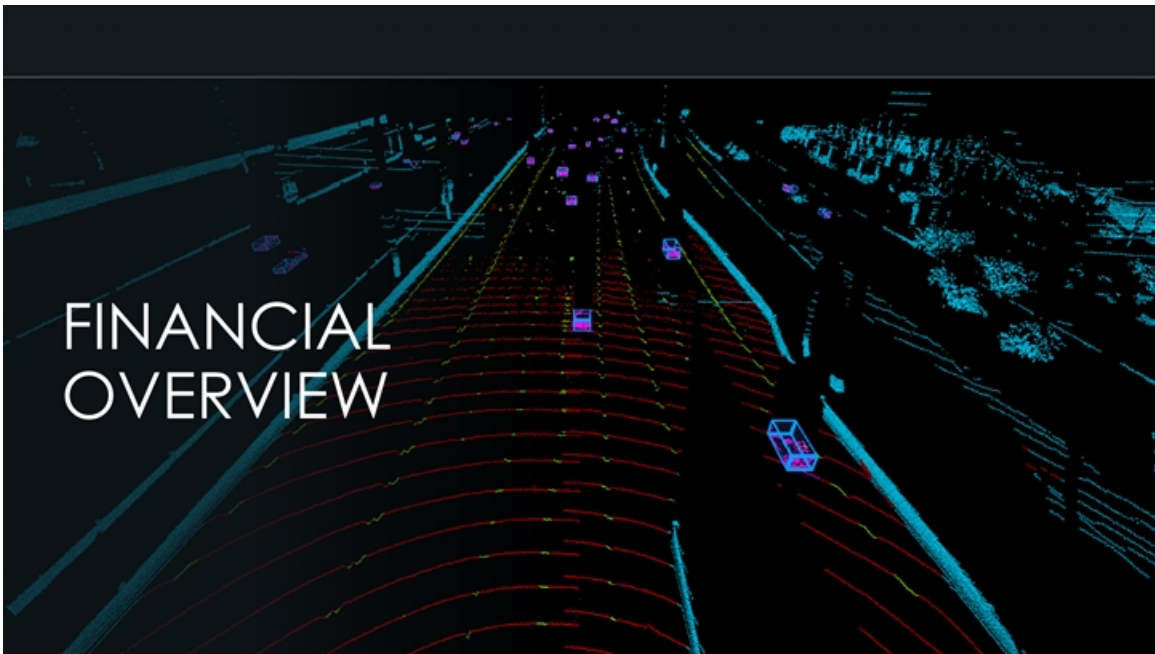

BUILDING A GLOBAL ECOSYSTEM

- Internally developed manufacturing IP enables flexibility for scaling of production with multiple partners (i.e., CMs and/or Tier 1s)
- Leveraging global supply chain expertise to bring leading technology to market efficiently

FINANCIAL OVERVIEW

FINANCIAL HIGHLIGHTS

COMMENTARY

- Revenue primarily driven by automotive series production programs, commencing in 2022E
- This can be broken down into three sources:
 - Base lidar hardware only
 - ADAS proactive safety solution (lidar HW + SW)
 - Highway autonomy solution (lidar HW + SW)
- Over 90% of 2025E revenue expected to be from existing partner base
 - Growth driven by development programs transitioning to series production
 - Two programs already made this leap with Luminar in 2020
 - Working with our partners to convert an additional 8 programs to series production over next 24 months (~4 programs forecasted on weighted probability of occurrence)
- Opportunity to standardize Luminar's technology across an OEM partners' entire production base
- Prior to series production in 2022E revenue primarily sourced from:
 - Test and development unit sales
 - NRE revenue / other

REVENUE (\$M)

SENSOR UNIT SALES (000s)

¹ Luminar estimate of forward-looking order book reflects cumulative projected future sales of hardware and software over the life of a program based upon Luminar's estimates of volumes and pricing.

FINANCIAL HIGHLIGHTS (CONT'D)

COMMENTARY

- Capital-light model with near-term commercialization
 - Focused on nearer-term business opportunities with OEMs to drive growth & economies of scale
 - Does not require billions for R&D and CapEx like other autonomous technology companies
- Scalable business model
 - Same HW and SW products across entire partner base
 - Contract manufacturing labor outsourced for series production
 - Gross margin rapidly increases as manufacturing & tooling overhead amortized over production volumes, further enhanced with reduced BoM cost
 - Operating leverage from relatively fixed cost base and SG&A
- Exponential improvements in BoM from scale and VAVE
 - Core IRIS BoM estimated at <\$500 / unit in series production
 - Long-term target <\$100 with next-gen components at greater scale
 - Enables lower ASPs to drive greater unit volumes and widespread standardization
- Large strategic investments being made with new capital
 - Core business requires ~\$250M to cash flow positive
 - Planning to invest an additional ~\$150M to develop full-stack highway autonomy and proactive safety software

GROSS PROFIT (\$M)

EBITDA (\$M)

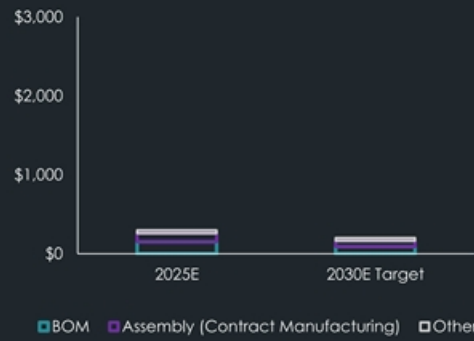

EBITDA LESS CAPEX (\$M)

ILLUSTRATIVE UNIT ECONOMICS (CPV) AND MARGINAL COST

— ADDRESSABLE CONTENT PER VEHICLE (PASSENGER) — MARGINAL COST PER SALE

- Higher CPV potential for CVs, robo-taxi and adjacent markets
- 3-4 sensors per vehicle opportunity for certain applications
- Excludes any potential benefit from insurance, system level hardware/software and data collection
- Typical OEM trim package pricing of \$3-8k per vehicle for Highway Autonomy. Proactive Safety has opportunity to be standard on vehicles

- Same HW/SW and cost for Highway Autonomy and Proactive Safety
- Includes material cost and contract manufacturer cost per unit
- Includes warranty and QMS cost per unit
- Excludes manufacturing overhead as well as SG&A and R&D

TRANSACTION OVERVIEW

TRANSACTION OVERVIEW

TRANSACTION STRUCTURE⁽¹⁾

- Business combination between Luminar Technologies, Inc. ("Luminar") and Gores Metropoulos, Inc. (Nasdaq: GMHI) ("Gores Metropoulos" or "GM"), a publicly-traded special purpose acquisition company
- \$170 million financing directly into Luminar (the "Series X Financing") which was fully committed at transaction signing (August 24, 2020) and funded immediately, anchored by top tier institutional investors including Alec Gores, Van Tuyl Companies, Peter Thiel, Volvo Cars Tech Fund, Crescent Cove, Moore Strategic Ventures, Nick & Jill Woodman and VectoIQ
- Post-closing, company will retain the Luminar name and be listed on Nasdaq under the new ticker symbol "LAZR"
- Expected to close in Q4 2020E

VALUATION

- Fully diluted pro forma equity value of ~\$3.4 billion (assuming \$488 million in net cash at closing)
- Existing Luminar shareholders will roll the entirety of their existing equity holdings into the combined company and are expected to receive ~80% of the pro forma equity⁽²⁾

CAPITAL STRUCTURE

- Funded by a combination of GM cash held in a trust account, and proceeds from the Series X Financing
- Transaction will result in \$520 million of cash on the balance sheet to fund growth⁽²⁾

¹ Existing Luminar shareholders to receive an earnout to vest over 6 share price hurdles (approximately 4.3M shares of each of the following share prices): \$13.00, \$14.00, \$19.00, \$22.00, \$25.00, \$28.00.

² Assumes no redemptions by GM's existing public shareholders and before impact of warrants and earnout. Pro forma ownership of 80% excludes Series X investment.

PRO FORMA EQUITY OWNERSHIP

SOURCES (\$M)

GM SPAC Cash in Trust ⁽¹⁾	\$400
Series X Investment	\$170
Seller Rollover ⁽²⁾	\$2,718
Total Sources	\$3,288

USES (\$M)

Seller Rollover ⁽²⁾	\$2,718
Proceeds to Luminar ⁽¹⁾	\$520
Total Deal Expenses	\$50
Total Uses	\$3,288

PRO FORMA VALUATION

Share Price	\$10.00
x PF FD Shares Outstanding (M) ⁽³⁾	338.8
Market Cap (\$M)	\$3,388
Less: Net Cash (\$M) ⁽⁴⁾	\$488
Enterprise Value (\$M)	\$2,900

PRO FORMA OWNERSHIP⁽²⁾⁽³⁾⁽⁵⁾

¹ Assumes no Gores Metropoulos stockholder has exercised its redemption rights to receive cash from the trust account. This amount will be reduced by the amount of cash used to satisfy any redemptions.
² Excludes impact of aggregate exercise price associated with existing Luminar options and warrants.
³ Based on fully diluted shares outstanding assuming net share settle of existing Luminar options and warrants at pro forma \$10.00 share price.
⁴ Assumes -\$32M net debt prior to transaction and -\$520M of net proceeds to be added to Luminar's balance sheet.
⁵ Assumes a nominal share price of \$10.00. Ownership excludes impact of warrants and earn-out.

Key Inputs and Assumptions

- The applied range of EBITDA multiples are centered around the median of Luminar's peer group 40.0x 2021 EBITDA, with sensitivity built in on both the high and low ends.
- Implied Future Enterprise Value calculated by applying a range of multiples to Luminar's 2025E EBITDA. That Implied Future Enterprise Value is discounted four years back at a 20% rate to arrive at an Implied Current Enterprise Value.
